Schlebel, W.
THE LIMITS OF ACCURACY IN THE ANALYSIS OF
RAW SUGAR BY POLARIZATION. [1963] [16p].
Order from SLA \$1.60
63-16366

Trans. of Zucker (West Germany) 1958, v. 11, no. 8,
p. 182-187.

DESCRIPTORS: *Carbohydrates, *Polarographic
analysis, Polarization.

The examination of raw sugar through polarization
requires above average care and experience. The
results will be influenced by a number of factors
which are called natural errors occurring in the indi-
vidual steps of the investigation. It is very important
that the methods used by individual laboratories be
identical, in order to have differences of 0.1 or 0.2
of a degree of polarization appearing as little as
possible. A few suggestions are given. (Author)
